THOMPSON TECHNIQUE

Developed by Clay Thompson, DC, Thompson Technique uses the *Zenith* Thompson® adjusting table with pneumatically driven, segmented drop system, which quickly lowers the section of the patient's body corresponding with the spinal region being adjusted. The doctor thrusts at high speed, using minimal force, because while the thrust initiates movement, the fast drop carries the joint through the remainder of its range of motion.

Experience the Thompson Technique from the five basic categories, through the full spine and extremities. Dr. Rob Jackson has been a certified Thompson Technique instructor since 1981 and traveled the world teaching with Dr. Clay Thompson for 17 years.

Be prepared for those difficult cases or use this as a preparation tool for the certification exam or instructors training program. 100% of all proceeds from the sale of this DVD set go to the Thompson Technique Foundation which sponsors technique programs, research and technique development. The set includes eight full-length DVDs and contains almost nine hours of instructions.
